Btech ECE II Year

Team Member 3 Name: Jarul Jangid

Btech ECE III Year

Team Member 4 Name: Gurkirat Singh

Btech ECE II Year

Team Member 5 Name: Dev Sharma

Btech ECE II Year

Problem

The current AICTE site :

- Lacks responsiveness
- Is not user friendly
- Navigation is a difficult task.

Solution

Our idea involves developing an app for AICTE which:

- Will be responsive.
- Will consist of a better UI.
- Will make it easier to navigate through the app.

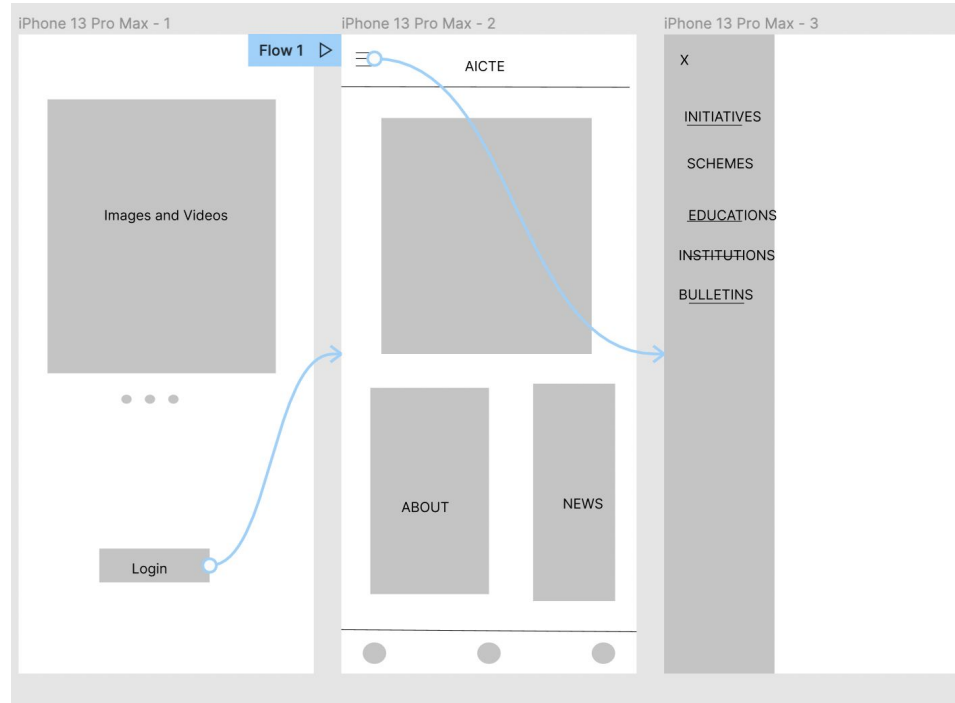

Market Size

Everyone who would like to volunteer or learn information about the colleges under AICTE and the courses offered by AICTE.

Product

- Architecture : Flutter + Firebase
- Ecosystem : Android/iOS
- Saleability : Free and accessible to everyone
- Channels : Google Play Store, Apple App Store

Flow Chart

Summary

We want to make an application which is accessible and usable by any and all individuals trying to use it. We want to make it more user-friendly.

Easy access to information and important/frequently required useful information like, approved & unapproved institutions, etc.

The current AICTE website is very barebones and basic, so we want to make a platform to access this site in a more convenient way (especially on Mobile Devices).
